

signal extraction pulse oximetry

Masimo's strategy is to offer its breakthrough technology to all patient monitoring companies who wish to improve the standard in pulse oximetry performance by offering a clearly superior technology without charging a price premium over other products currently on the market. Masimo Signal Extraction pulse oximetry technology is an open architecture that can be integrated into virtually any monitoring configuration.

You can currently get accurate pulse oximetry monitoring during motion, low perfusion and when you need it most, in many different configurations, through these leading patient monitoring companies.
